The Omni Express VS is a new intuitive approach to patient vital sign measurement. The Omni Express can be configured in the field by the user to measure any combination of: non-invasive blood pressure, SpO2, rapid oral temperature, and capnography (EtCO2).

Weighing in at less than 6 LBS the portable **Omni Express VS** is well suited for any patient care area by offering a multitude of vital sign combinations. The Omni Express VS can be used as a simple Spo2/NIPB monitor for continual bedside measurement or Spo2/NIPB/Rapid temperature for quick vital sign spot checks. EtCO2 can also be added to recreate the Omni Express VS into a bedside or spot check Capnograph.

The Omni Express VS simplifies clinician use by incorporating a touch screen with an easy-to-use software interface. A lithium Ion Battery is also incorporated and a 3 channel recorder can be added. Nellcor Oximax™ SpO2 and Suntech™ blood pressure can also be added as options.

Temperature Reading within 4 seconds

The Covidien Filac 2000™ plug-in thermometer module can be installed into the Omni Express VS anywhere and anytime. This simple plug-in module adds the option of a 4 second oral temperature reading brightly displayed on-screen. The **Filac 2000™** supports infection control by utilizing single use probe covers and a probe isolation chamber when not in use.

INFINIUM ®

Infinium Capnotrack™

Simple connection sample lines allows the **Capnotrack™** to be one of the industries lowest cost per patient End-tidal CO2 systems.

The Infinium Capnotrack™ capnography module is a field upgradeable plug-in module that allows for maximum versatility of End-tidal CO_2 monitoring. The Capnotrack™ utilizes a low flow (50ml/min) sidestream method that allows use for intubated and non-intubated applications. The Capnotrack™ sample line connection incorporates filter cells to eliminate the potential of cross contamination.
