

Alcohol Free safeHands[®] sanitizer

safeHands[®] is the **ONLY** patented
Alcohol-FREE hand sanitizer formula on the market

The safeHands Alcohol-Free Sanitizer provides a next generation, safe alternative that is just as effective in killing germs as the leading brands due to FDA approved active ingredient BAC. The safeHands alcohol-free proprietary chemistry enables significant "microbe killing power" while working with the natural oils of the skin. safeHands alcohol-free formula moisturizes and softens the skin like a lotion without leaving behind a sticky residue or unpleasant scent.

Target Markets

- Primary Care
- Secondary Care
- Extended Care
- School Health
- Dental
- Correctional

- Kills 99.99% of most common illnesses
- Only BAC patented hand sanitizer
- Non-toxic / Non-flammable

Alcohol-Free Sanitizers:
 Sanitizers containing alcohol have recently come under scrutiny as investigations of accidental ingestion, intentional ingestion, and even fires highlight the dangers of alcohol-based sanitizers. SafeHands offers a safe alcohol-free alternative to sanitize hands and surfaces.

Alcohol Free safeHands sanitizer	Alcohol-Based Hand Sanitizers
FDA approved active ingredient, Benzalkonium Chloride kills 99.99% germs	Alcohol kills 99.99% of germs
Moisturizes as it sanitizes	Sensitivity and potential dryness
Non-toxic / safe application	Potential dangers of misuse (ingestion and flammable) due to 67% alcohol content
